

PTFE SKIVED SHEET

Code: KXT PSS

PTFE Skived Sheets

Owing to vast experience in these fields, we offer high quality PTFE Skive Sheets. These products are manufactured from high quality raw materials. These raw materials are procured from trusted vendors. These products are widely used in designing circuit boards, pumps and valves. These products are known for their excellent insulating and chemical resistance properties. We believe in effective and timely delivery of these products once ordered by our valuable customers.

Benefits of PTFE Skive Sheets:

- It offers extraordinary resistance to high temperature and flames because it has very high melting point and autoignition temperature
- It has low rate of heat release and smoke generation and can sustain sort exposure at higher temperature
- PTFE/TEFLON constitutes no fire hazard as it is non-inflammable
- It has been used satisfactorily at temperature close to -200 deg.C to $+250$ deg.C

Usage:

- PTFE sheets and films are used in a wide variety of industries including heavy electricals, electronics (for circuit boards), pumps and valves. We capable of achieving global standards of tolerance on skived tapes, sheets and films

Specifications:

Grade	Virgin
Temperature Range	-200 Deg.C to $+250$ Deg.C
Tensile Strength	2,500-4,000 PSI
Gravity Between	2.13-2.24
